

Product name - Skadoosh

Team name - The Goon Squad 2

Spring completion date - April 24, 2018

Revision number & revision date: 1 & April 12, 2018

Goal: Have basic layout made for each page (landing page, login, etc.)

(User story 1) As a developer, I want the local testing and build for Heroku set up for ease of development (8 story points)

- Task 1: Setup Heroku (2 hours)
- Task 2: Setup Django (3 hours)
- Task 3: Setup React/Redux (3 hours)
- Task 4: Setup build scripts, Developing.md, more description to current README.md (5 hours)

Total hours: 13 hours

(User story 2) As a user, I want the layout to have a modern, stylistic theme for the user's convenience

- Task 1: Create landing page (3 hours)
- Task 2: Create login page (3 hours)
- Task 3: Create interface for different views (10 hours)
- Task 4: Add schedule view to interface (3 hours)
- Task 5: Add major requirement view to interface (3 hours)
- Task 6: Add GE requirement view to interface (3 hours)
- Task 7: Add class picker view to interface (3 hours)
- Task 8: Add modern looking css (10 hours)

Total hours: 38 hours

(User story 3) As a user, I want to navigate through each part of the web application for the user's convenience

- Task 1: Create navigation bar for interface (5 hours)
- Task 2: Change view based on navigation item (8 hours)

Total hours: 13 hours

Grand total: 64 hours
